PROFESSIONAL SUMMARY

Full Stack Developer and Data Analyst with a 7-year professional foundation in international technical communication and ICT education. Specialized in architecting USSD-integrated Java/Spring Boot applications for low-connectivity environments and optimizing data integrity within Tier-1 banking systems. Leveraging insights from international field research in Mumbai and Cyberjaya, I apply global standards in high-concurrency design to deliver secure, resilient, and compliance-driven digital infrastructure.

EXPERIENCE

Full Stack Developer | Hematrikan Innovation Jan 2026 – Present

- Engineered 10+ responsive web modules for hematrikan.com using React.js and Spring Boot, by translating platform requirements into modular, reusable frontend components and corresponding backend services.
- Integrated 3 core backend APIs connecting client-facing interfaces to Spring Boot microservices, by designing RESTful endpoints and validating request/response data integrity across environments.
- Developed parallel USSD API integration alongside the web platform, by architecting a shared service layer that delivered equivalent functionality to non-smartphone users in low-connectivity regions, achieving full accessibility across both channels.

Data Analyst Intern, KYC Unit | Stanbic Bank Jun 2026 – Present

- Validated 90+ client KYC records daily (1,800+ monthly) by extracting raw data from the Finacle Core Banking System, transforming it through structured Advanced Excel reconciliation, and validating against the Corporate Data Warehouse, in support of full AML compliance.
- Reconciled client data discrepancies between Finacle outputs and the Corporate Data Warehouse, by performing structured comparison and correction workflows in Advanced Excel.

Student Full Stack Developer | SUMIC IT Solutions Ltd — Entrepreneurship Booster Platform (Woord en Daad / EU-Funded) Oct 2025 – Jan 2026

- Architected the Entrepreneurship Booster Platform (EBP), a USSD-integrated solution reaching 50,000+ rural users, by designing mobile-first interfaces suited to low-connectivity deployment.
- Won 1st Place at the Multi-University Hackathon (2025), by delivering a functioning rural technology prototype under competitive time constraints.

TECHNICAL RESEARCH & FIELD STUDIES

Mumbai, India | Digital Public Infrastructure & Fintech Resilience Study 2026

- Conducted technical analysis of Digital Public Infrastructure (DPI) and high-concurrency fintech resilience across the Bandra-Kurla Complex (BKC) and Powai technology corridors.

Cyberjaya, Malaysia | National Digital Infrastructure & Smart City Study 2026

- Conducted infrastructure analysis of national-level digital hubs, including the Malaysian Communications and Multimedia Commission (MCMC) and iTech Tower, examining Smart City scalability models.

PROJECTS

Founder & Architect | Kings Technologies (Startup Initiative) 2026 – Present

- Defining the technical roadmap for a future-facing consultancy focused on Digital Public Infrastructure (DPI) and USSD-integrated solutions, by incorporating architectural insights from field studies in Malaysia and India into scalable software frameworks.

Agri-Trace — Digital Identity for Ugandan Produce | Final Year Project, ISBAT University Ongoing

Developed as a Final Year Project: an academic research initiative implemented to industry-grade engineering standards.

- Developed a USSD-integrated harvest registration module (*284#) using Java Spring Boot, by enabling coffee farmers in Kabale and Masaka to digitize harvest data on basic feature phones.
- Engineered a cryptographic hashing protocol for generate-on-demand QR codes, by assigning each coffee sack a traceable digital record from farm-gate to warehouse to reduce data tampering by intermediaries.
- Coordinated user acceptance testing (UAT) with pilot field testers, by validating UI/UX localization against the operational realities of Ugandan smallholder farmers.

Namatovu Florence Platform — USSD Youth Job Platform | Independent Project Ongoing

- Developed a mentorship platform connecting youth to opportunity using Java Spring Boot and USSD APIs, by architecting microservices to handle concurrent low-bandwidth sessions.
- Managed a beta pilot of 200+ users, by processing 1,000+ USSD requests to test system latency and microservice stability under real-world conditions.

PROFESSIONAL HISTORY

Professional Foundation & Technical Communication | ICT Teacher & Multimedia Designer — International Schools (China/Uganda) 2017 – 2023

- Mentored 500+ students and staff in digital literacy, by translating complex AI and software concepts into accessible instruction for non-technical audiences.
- Developed cross-cultural communication and operational maturity over six years in ICT education (2017–2023), including three years of international experience in China.

EDUCATION

BSc, Applied Information Technology (Final Year Candidate) | ISBAT University, Kampala Expected 2027
Cumulative GPA: 4.81 / 5.00

German Language Course (Level A1) | Goethe-Zentrum, Kampala Jul – Aug 2025

Advanced Diploma in Multimedia and Animation | Aptech Computer Education Sep 2014 – Dec 2016

TECHNICAL SKILLS

Proficient

- Java, Spring Boot Microservices, React.js, USSD/SMS API Integration, SQL (MySQL, PostgreSQL), Microsoft Office Suite

Familiar / Academic Knowledge

- Python, C++, C, C#, Django

Additional Tools & Frameworks

- JavaScript, HTML5, CSS3, Vue.js, Bootstrap, Node.js, MongoDB, Git, GitHub, Maven, Agile/Scrum

Design

- Adobe Creative Suite, Moho 12

LANGUAGES

English (Fluent) | Luganda (Fluent) | German (A1)
